------------------------------------	----

1. Deliverable description

Deliverable 7.12 Publications (1)

Task 7.6: Publications (press-releases, articles) in technical press & Publications (press-releases, blogs, articles) in public press.

- Professional and scientific publications (1/year) (Lead: SEZ, Partner: IAO, UoM, MMU, TUE, UiS): Research outputs from this project will be disseminated through professional and scientific publications, peer-reviewed papers, and international journals (such as IEEE Trans. Comm., Power Electronics, Smart Grids, and Sustainable Energy, International Journal of Green Energy, etc)
- Press releases and articles for general readers (Lead: SEZ, Partners: All): will be produced to be published in newspapers, publications at local level, a more general publications without scientific background. Topics: Project progress, project meetings, project trainings, workshops, webinars, events (carried out in WP-3-7); Target group at local city level, national level, EU level and if possible international level e.g. via CORDIS wire, IDW, Smart Cities and Communities Stakeholder Platform, BUILD-UP, CoM, LinkedIN groups, ICLEI, ERRIN, POLIS, CIVITAS.
- eNewsletter (Lead: SEZ, Partners: All): will be distributed on a regular basis presenting project activities and information about the project's progress and intermediate results. For the distribution the networks of all partners, subscribers of the newsletter (subscribed on the website, acquired during events or direct contact) will be used. English language
- Blogs and short articles (Lead: SEZ, Partners: All): will be published on the website or in specific social media platforms (e.g. LinkedIN Groups, Facebook, Twitter, BUILD UP, Smart Cities and Communities Stakeholder Platform) to increase online interactions and professional exchanges on Smart City topics.
- Publication and Dissemination of the Lighthouse City video-clips (Lead: SEZ, Partners: MMC, EIN, SK): showing the project progress in the Lighthouse Cities also including interviews of Follower Cities. They will be produced beginning of year 2 on a regular basis e.g. all 6 months, at all three sights (done by local producer). This task will be carried out in WP3-5 lead by the local city coordinators. Each video clip will have its own character but the jointly developed CI will be implemented. The videos will be published on YouTube but also implemented on the project website as well.

This deliverable will be repeated every year (M12, 24, 36, 48, 60).

2. Realization

Deliverable 7.2 contains:

- Peer reviewed publications
- University/Publication/Scientific Monograph
- Thesis/Dissertations
- Articles/Sections in an edited book series
- Papers in proceedings of Conference/Workshop
- eNewsletter
- Twitter blog
- News on the website

Realization tool:

The project partners use the tool EMdesk to communicate their publications. The work package leader gets a good overview on all publications of the partners.

On EMdesk the project partners can fill in the following information about the publication:

- Type of publication
- Title
- Author(s)
- Number date or frequency
- Date of publication
- Title of the periodical or series
- URL
- Place of publication
- Publisher
- Open access
- ISSN
- eISSN
- ISBN
- Relevant pages
- Owner

Figure 1 Screenshot of EMdesk

The screenshot shows a web-based form titled "Add a new publication". At the top left is a "Publications" tab. Below it is a navigation bar with links: Progress, Resources, Costs, Deliverables, Milestones, Risks, Dissemination, Publications (which is the active tab), and Cooperation. The main form area has a title "Add a new publication" with a close button. It contains several input fields and dropdown menus. The "Type of publication" field is set to "Peer reviewed publication". The "DOI" field is empty. The "Title" field is highlighted with a red border. The "Author(s)" field is empty. To its right are fields for "Number date or frequency" and "Date of publication", both of which are empty. The "Title of the periodical or series" field is empty. Below these are fields for "URL" and "Place of publication", both empty. The "Publisher" field is empty. To its right is a dropdown menu for "Open access". The "ISSN" field is empty. To its right is a field for "eISSN". The "ISBN" field is empty. Below these are fields for "Relevant pages", "Public & Private Participation" (with "Yes" checked), "Peer Review" (with "Yes" checked), and "Owner".

2.1. Publications

Please find the full list of publications in the period of 01.02.2015-31.01.2016 below.

Type of publications:

- 25 x Peer reviewed publication
- 4 x University/Publication/Scientific Monograph
- 1 x Thesis/Dissertation
- 7 x Article/Section in an edited book series
- 2 x Paper in proceedings of Conference/Workshop

2.2. Communication tools (social media)

The Triangulum project uses several communication tools to make the news and innovations public to everyone.

2.2.1. Website

On the project website interested stakeholders are able to find the latest news on the project and the newsletter with all information at a glance as pdf. There is a "subscribe"-button on the website to subscribe to the Newsletter.

Triangulum General Assembly Meeting in Berlin

From 24-25 November 2015 all Triangulum partners met in the Spy museum in Berlin for the General Assembly Meeting. Besides the progress presentations, central Triangulum topics like the development of the "smart city replication framework" and the "ICT reference architecture" were discussed in workshops.

2.2.3. Newsletter

The first project newsletter has been published in November 2015. All partners have been involved. Especially the city coordinators were asked to send the latest news and activities to the Dissemination and Communication coordinator. All local Dissemination & Communication coordinators have given their input.

In order to address directly our interested stakeholders, we decided to create a newsletter in pdf format and to send it to the subscribers on the website.

The newsletter contains the activities in the project. The next one will be published in the end of January and will contain the first results of the On-Site Assessments.

http://www.triangulum-project.eu/wp-content/uploads/2015/10/151217_Triangulum_Newsletter_1.pdf

Figure 4 Newsletter

Welcome!

Dear Readers,

We have a clear objective: Triangulum is going to demonstrate, disseminate and replicate innovation, urban solutions and a detailed framework in order to co-create our future 'smart' cities. The significant commitment and effort of all partners and stakeholders stands behind the current progress of our lighthouse projects in Stavanger, Eindhoven and Manchester. First visible results have already made their appearance with examples such as the initiation of new urban governance processes in some cities, or the Nordic Edge Expo in Stavanger, Norway.

The Triangulum project started highly motivated with a kick off meeting in Manchester in February 2015. On the following six weeks, Lighthouse Cities started detailing the implementation process of smart city solutions within their lighthouse districts. A lot has been achieved ever since and we are happy to keep you updated with the progress in every newsletter.

In strong collaboration with city partners, academic institutions from the lighthouse cities and Fraunhofer have started working together on the monitoring and replication framework. During the first on-site assessment in the lighthouse city Eindhoven (held in October) a huge amount of interviews were conducted. Local experts from the smart solutions implementation layer and from political and administration bodies helped enhancing the knowledge about Triangulum activities. This same process will be replicated in the respective Stavanger (30.11- 11.12.2015) and Manchester (11.01-22.01.2016) on-site assessments.

Follower cities Sabadell, Prague and Leipzig are also joining the onsite assessments, and profiting from the existing and emerging experiences during the implementation processes. They are the first municipalities following the evolution of the Triangulum Lighthouse Cities, and therefore will test the replication potential. The on-site assessment, to develop smart implementation plans in the follower cities took place in June 2015 in Prague, and will take place in Sabadell and Leipzig in February 2016.

Key to the success of the SSC1 projects is team work. Thus we would also like to thank all partners for the valuable contribution and are looking forward to linking these solutions to the work of our colleagues from the other lighthouse projects in 2016.

Happy Christmas and a successful year 2016!

Dawain Wagstaff
