# 1. Introduction

# Purpose of this document

The purpose of this document is to inform partners of the communication and participation strategy for the Triangulum project at city level i.e. Manchester over the next 12 months. It describes the work of the Manchester partnership and details the communication activity delivered during M36 – M47. Section 4 details the communications plan for M48 – M60.

## **Communication Objectives**

The communication objectives are to:

- Identify common communication tools for use by project partners
- Ensure a consistent message to be communicated by project partners
- Identify relevant channels of communication to stakeholders
- Produce a defined set of actions to communicate and disseminate project outcomes

#### **Communication Levels**

There are two communication levels in Triangulum.

- Project level: Steinbeis-Europa-Zentrum (SEZ) is leader of WP7 Communication and Dissemination. They are responsible for all the management and coordination of dissemination and communication in the Triangulum project.
- City and WP level: there are designated local dissemination and communication coordinators for each Lighthouse and Follower city. Manchester City Council (MCC) is responsible for the coordination of communication and dissemination at a city level and WP3. This involves communicating with a project colleagues, a wide range of audiences, and also employees and students who live, work and study on the Oxford Road Corridor.

### **Manchester Partnership**

The Manchester partners are updated on the main communications issues via a monthly board meeting - all Manchester Triangulum partners (MCC, MMU, UNIMAN, Seimens, and Clicks & Links) and Oxford Road Corridor are represented board meetings.

Following on from the two workshops were held during the period M25-36, a third meeting is planned for early 2019 (M50) to plan communication and dissemination for the final year of the project.

The intention is to enable partners to share best practice, opportunities and project outcomes across a variety of platforms and to reach a broad range of audiences. All partners need to be aware of the project's communication plan and have a strategy for communication.

#### **Target Groups**

The focus of the communications WP3 Manchester programme is on the organisations based in the Corridor Manchester area, including employees and the student population. The Corridor Manchester is primarily a business area hence the focus is principally on these groups rather than residents.

The project targets a wide range of stakeholders at both national and local level. These include: building managers, global experts, local residents, political members.

# 2. Subtask 3.5.2 Communication Tools

This will focus on the design and implementation of digital based tools on an iterative basis that will be used to create awareness about the Manchester component of the project.

The project will use a range of tools / assets for communications:

# 2.1 Presentations

A generic Manchester Triangulum presentation is regularly updated and available to all partners to present at events.

Figure 1 Excerpt from the WP3 presentation

# 2.2 Banners

There are three Manchester versions of Triangulum roll up banners. These are available for partners to use at events. They were funded by the Triangulum project.

Figure 2 Triangulum banner

## 2.3 Promotional Videos

#### Video Media

There is a strategy in place to produce a series of videos to explain the project's activity and hosted on the Triangulum website / made available via Twitter and the project's YouTube channel.

 In M20, MCC procured the production of four videos on project themes. In M31, the first video on mobility was released via Twitter, Triangulum website, and the Triangulum YouTube channel.

https://www.youtube.com/watch?v=ACFeyVznmwA&index=1&list=PLU5o8H82DLK0GtuS 941JiJCM-TuNntqVN

At M48, the video has received 2,919 views on YouTube.

- Preliminary work has begun on a Triangulum Energy film (funded by Siemens). Following
  the supplier ceasing to trade, MCC procured a new film producer for two further videos
  (data and a Manchester overview). These are planned for M48 onwards.
- In M40 Siemens made an in house film (for internal use) demonstrating how Triangulum work undertaken at MMU has benefitted the University's on site energy system.
- In M40 drone footage of the solar PV installation at MMU's Brooks Building was commissioned. This is available on the Triangulum YouTube Channel https://youtu.be/0zD9 HTairg

The following videos are available to view on the Triangulum website - <a href="https://www.triangulum-project.eu/?page\_id=116">https://www.triangulum-project.eu/?page\_id=116</a>;

- Manchester Metropolitan University Brooks Solar PV Panels.
- Manchester leading the way for electric vehicles.
- Manchester Climate Change Agency interview with Ettore Murabito (UNIMAN).
- Manchester Climate Change Interview with Andrew Smythe (Siemens).
- Manchester Climate Change Agency interview with Jason Smith (UNIMAN).
- Manchester Metropolitan University's electric switch.
- Manchester Climate Change Agency Damian Wagner & Kelly Watson interview (FHg/UNIMAN).

# 2.4 Case Study Flyers

Five case studies (Electric-Assist Cargo Bike Loan Scheme/Purchase and Lease of Electric Vehicles/Data Curation and Visualisation/Birley Campus Micro-Grid/Manchester Art Gallery Building Optimisation) are available for partners to use at events / promotions. These feature the themes of the Triangulum Project – Energy, Mobility, and ICT, produced in M43. These are used at any events to raise awareness of the impact and benefits in Manchester.

Figure 3 Case study flyers

# 2.5 **Promotional Goods**

Two items of promotional goods have been purchased to promote the project:

- Portable phone/laptop chargers
- Promotional umbrella's these have been used for tours of the Triangulum sites.

Figure 4 Portable charger & umbrella

# 2.6 **Web**

News of current activities are promoted both internally and externally via the web by the partners. Additionally, the Manchester partners maintain a Triangulum presence on their organisational websites:

- MCC –
   https://www.manchester.gov.uk/site/custom\_scripts/smarter\_city/case\_studies.php?id=13

   8652
- UNIMAN http://www.seed.manchester.ac.uk/research/research-with-impact/triangulum/
- CL http://clicksandlinks.com/dvteam/triangulum/
- Siemens <a href="https://www.siemens.com/uk/en/home/company/topic-areas/sustainable-energy/triangulum.html">https://www.siemens.com/uk/en/home/company/topic-areas/sustainable-energy/triangulum.html</a>
- Oxford Road Corridor <a href="http://www.corridormanchester.com/low-carbon--smart-cities.html">http://www.corridormanchester.com/low-carbon--smart-cities.html</a>

 Manchester Climate Change (MCC supports MCCA, who include a page about Triangulum on their website - <a href="http://manchesterclimate.com/content/triangulum-project">http://manchesterclimate.com/content/triangulum-project</a>)

# 2.7 Social Media

#### Social Media

The Manchester partners all maintain their own Twitter and social media accounts. The Twitter account used by Manchester City Council is @smartercitymcr. At the close of M48, this account had 4,448 followers.

MCC - tweeted/re-tweeted 100+ posts via the @smartercitymcr and the @Triangulum\_EU Twitter accounts mentioning the Triangulum Project in 2018. The @Triangulum\_EU account is generally managed by SEZ (WP7) but partners are encouraged to tweet from there as well.

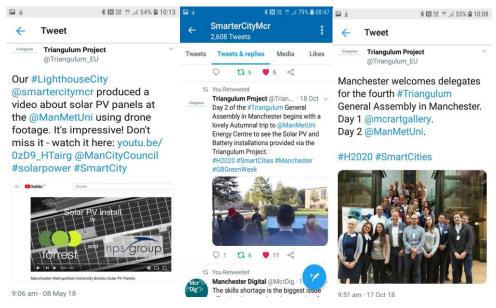

Figure 5 Sample Tweets

UNIMAN tweeted about Triangulum and posted the image below (M45) during the first "GB Green Week". This was a national event to promote student involvement in climate change.

Figure 6 UNIMAN "GB Green Week" twitter post

# 2.8 Online & Digital Dissemination

## 2.9 Additional Assets

# **Display Sign**

In M44 a sign was erected at MMU showing the solar PV and battery storage installations. This provides students and visitors to the university details of the impact and benefits that Triangulum has brought to MMU.

Figure 8 Triangulum sign at MMU

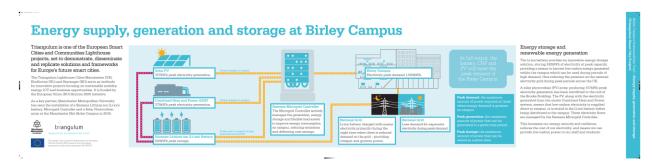

Figure 9 Triangulum sign infographic

# 3. Subtask 3.5.3 Communication Events

A programme of dissemination events will be developed for local and national organisations maximising existing networks.

During the period M37-48 the following events were undertaken by the Manchester partners.

## 3.1 Presentations - Internal

# **Manchester City Council**

Briefings took place to political members and MCC senior management team, including:

• Councillor Sir Richard Leese – Leader – prior to his involvement in the Triangulum Mobility film and attendance at the South By South West event in Austin TX.

- Sara Todd Deputy Chief Executive spent day with City Policy department 20/12/2018.
- Councillor Angeliki Stogia Executive Member for Environment and Skills attended special project board meeting in M44 (4<sup>th</sup> September 2018) where all aspects of the project were presented along with a tour of the MMU site. This has been followed up by discussions on how to further apply opportunities and learning from the project in the city.
- M46 Sara Todd, Deputy Chief Executive spent the day with the City Policy department on 20/12/2018. She was updated on the progress of Triangulum.

Figure 10 Councillor Stogia visits Battery installation at MMU

MMU and UNIMAN promoted the use of EVs and cargo bikes via social media, interviews and internal news bulletins.

Siemens have promoted their work on the energy storage solution internally and this will also be showcased in the Triangulum energy film.

| Date            | Event and location                                    | Description  | Audience size and type   | Who   |

### **General Assembly hosted by Manchester Partners**

In M45, 17 / 18th October 2018, Manchester hosted the 4th General Assembly (GA). a range of site visits to Manchester Art Gallery, and Manchester Metropolitan University's Energy Centre. Representatives from project partners attended the event. Two visits were arranged – CL to the data visualisation and to MBH to view the eCargo bikes and depot.

# 3.3 Conference

The Every Thing is Connected conference was held in Manchester: three days of events revolving around the theme of smart cities, from 20th – 22nd March, 2018 (M38). Day 2, 21<sup>st</sup> March "Smart City Live", focused on Triangulum and the smart city initiative <a href="https://www.triangulum-project.eu/?p=2612">www.triangulum-project.eu/?p=2612</a>

The value of combining this with other smart city projects in Manchester (CityVerve and SmartImpact) was the opportunity to broaden the audience to a wide range of delegates. This included representatives from the 9 SmartImpact partner cities (an URBACT smart city governance project). 100+ delegates attended from across the UK and Europe.

Triangulum offered hands-on workshops, field visits, demonstrations. The best practices and use cases developed by Triangulum were showcased centred on the project themes of transport, energy, and data. Workshops included a tour of the energy centre at MMU, hands on demonstrations of the mobility assets (cars, vans, eCargo bikes) and discussions of data platforms.

The Triangulum website summarised the activity <a href="https://www.triangulum-project.eu/?p=2964">www.triangulum-project.eu/?p=2964</a>

# 3.4 Awards

MCC, MMU and Siemens: In M47, MCC, MMU and Siemens were awarded first place in the Public Building Energy Project of the Year category at the UK Energy Awards 2018 for the innovative energy interventions of solar PV, energy storage solution and central controller at MMU. The Energy Awards is one of the industry's premier awards event. The judges commented "It was the Energy Management and Optimisation aspect of the project that won the Public Building Energy Project of the Year award at the 2018 Energy Awards"

www.theenergyawards.com/content/local-authority-initiative-year-new-0?search\_id=40

Figure 16 Manchester Triangulum win UK Energy Award

**MMU:** In M37, MMU was awarded the Greenest University in the UK by the student-led People and Planet organization (https://peopleandplanet.org/university-league).

**CL**: In M46, CL won an innovation award at the Coinnovem Sabadell - Innovative Ideas for Urban Development event, organised by the city of Sabadell, with their VR bike concept. The prize was €4.000.
