What is the goal of the City of Sabadell in Triangulum?
To evolve towards a green, social, transparent, participatory and innovative city based on social equality and vibrant entrepreneurship.

10 actions are being implemented under the Follower City Implementation Strategy of Sabadell, learning from the Triangulum Lighthouse Cities and responding to genuine local challenges:

ICT and Economic Development:
- Digital horizontal platform for real-time data integration.
- Videoconference and other city visualisation technologies applied to municipal services.
- Smart economic development in the fields of smart cities, sport and health.
- Maker space in connection with the circular economy and digital platform for shared spaces and resources.
- City beacons as interactive screens at the public space in crowded areas.

Energy:
- Application of energy efficiency measures in the refurbishment of existing buildings.
- Innovative applications of public lighting.

Mobility:
- Renewal of the municipal fleet of vehicles with sustainability criteria.
- Incentives for the green last-mile delivery of goods.
- Fostering green mobility to schools.
